

LTI22 – Language Intelligence @ Work: Putting the Customer in the Centre

Philippe Wacker

On 14-15 September 2022 in Vienna (Austria), LT-Innovate organizes its 9th yearly Language Technology Summit, entitled **Language Intelligence @ Work: Putting the Customer in the Centre**.

Language Intelligence @ Work is Europe's major event showcasing the latest developments in multilingual Artificial Intelligence: speech interaction, deep meaning processing, and multilingual communication and cognition. The Summit is an ideal meeting point between technology providers, users and integrators, business leaders, leading-edge developers and researchers, investors and analysts, serving to learn, exchange, network, forge new partnerships, find new clients, and get tuned to the multilingual intelligent future.

After two years of remission due to the COVID-19 pandemic, LT-Innovate decided to team up with five other organizations and to co-organize and co-locate LTI22 with SEMANTICS2022.

The extensive program has five parallel strands, including these themed highlights of LTI2022:

- Multilingual AI by Jochen Hummel (Coreon), Jan Oevermann (Plusmeta) and Thomas Lindemann (Fyrfeed)
- Towards One-stop-shop Language Intelligence Partner Spheres in the Cloud by Erik de Vrieze (RWS), Klaus Fleischmann (Kaleidoscope), Raniero Romagnoli and Vincenzo Sciacca (Almawave)
- LangOps – A New Industry Paradigm by Britta Aagaard (Semantix), Vasco Pedro (Unbabel), Jochen Hummel (ESTeam) and Bruno Hermann (LT-Innovate Board of Advisors)

Philippe Wacker is Executive Director of LT-Innovate, the association of the Language Technology industry. He has spent the last 30 years in the high tech sector as a manager of leading digital technology networks and his skills encompass technology evangelization and advocacy, strategic project planning, development and management, international project finance, multicultural networking and communication, and digital transformation.
